Passed all 3 parts of the exam the first time!

Many of the questions you went over in class were on the exam!

I recommended your class to others who did not pass the exam that day.

The exam reference books you allowed us to borrow made the difference for me.

The 7 hour long classes prepared me for the lengthy day of the exam.

The calculation book you supplied and taught from was the key to my success!

Your helpful "test taking hints" went a long way in preparing me.

Your expertise in the code, alarms, and business was quite evident.

The power point question format mimicked the actual exam format.

Your numerous handouts, e-mailed quizzes and other info helped me better prepare.

Learning how to find the keyword in the question made lookup easy.

I was more comfortable taking the exam after taking your classes.
